

4 TIPS ON CREATING A BALANCED DATA DRIVEN LIFE ENRICHMENT PROGRAM

AMY JOHNSON, CO-FOUNDER LIFELOOP

WWW.OURLIFELOOP.COM

INTEGRATE TECHNOLOGY TO CAPTURE AND UNDERSTAND RESIDENT BEHAVIOR

Integrate technology to better understand the behavior patterns of residents.

USE THE DATA TO UNDERSTAND AND PROVIDE PERSONALIZED PROGRAMS

Gain a better understanding of what is offered, what is attended, and if your program is balanced by categorizing types.

PERSONALIZE A PLAN BASED ON PATTERNS

Use tools that help capture each resident's behavior at a certain point in time. Look for reporting tools to make care planning easier.

UNDERSTAND PREFERENCES

Provide staff tools to quickly see a photo of a resident, understand what they like, or dislike, and notes that will help engage each resident. This is very important with high turnover. Engaging family is another helpful way to understand preferences.
