

Introduction to Cleaning

Training Worksheet

Every cleaning task involves 3 P's

Cleaning is the transferring of soil from contact point to disposal.

Thinning soil, releasing it from surfaces and holding it in the cleaning solution while it is being transferred for disposal is critical to good cleaning.

Understanding how cleaners clean.

4 properties of a detergent:

1. _____
2. _____
3. _____
4. _____

What's not wet? _____

The 3 principals of professional cleaning are:

1. _____
2. _____
3. _____

The key elements of thinning soil are:

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____

E _____ U _____ C _____ P _____ G _____

Dilution Ratios are important:

128 ounces = 1 gallon

1:512 = ¼ oz. per gallon

1:256 = ½ oz. per gallon

1:128 = 1 oz. per gallon

1: 64 = 2 oz. per gallon

1: 43 = 3 oz. per gallon

1: 32 = 4 oz. per gallon

1: 25 = 5 oz. per gallon

1: 21 = 6 oz. per gallon

1: 18 = 7 oz. per gallon

1: 16 = 8 oz. per gallon

1: 13 = 10 oz. per gallon

1: 10 = 13 oz. per gallon

1: 8 = 16 oz. per gallon

1: 5 = 25 oz. per gallon
