MDS 3.0

- New Updates You Need to Know!

The final copy of the MDS RAI 3.0 manual will be released before October of 2017, and internal reviews indicate the need for significant training. This direction from CMS gives specific directions and coding instructions for the new sections of the MDS assessment that will be implemented by all Skilled Nursing Facilities in October 2017. There are many changes to the MDS 3.0 form as well as new data collection instructions for the PPS discharge assessment (Section GG and a new discharge assessment form). October 2017, we will implement new items including Section N- Medications and Section P-Restraints and Alarms. All of this information is new and will be essential for proper documentation. This will be a unique opportunity to get the latest accurate information. We encourage all facility managers, clinical and therapy and MDS managers to attend.

All participants need a current (October 2016) MDS 3.0 RAI manual in order to attend this training. (Update pages will be provided.) We may have some available for sale the day of class or call to reserve yours with your registration.

Objectives

1. Identify for the NH Administrators the structure and requirements for the MDS 3.0 assessment process.
2. Review the HIPPA issues and the privacy Act statement requirements.
3. Discuss the impact of the definitions and structure in the RAI manual on the overall compliance of the facility.
4. Describe the most recent changes to the sections for the MDS assessments and new assessment documents.
5. Identify the implications for nursing home administrators related to payment regulatory changes.

Presenter

Leah Klusch is recognized as one of the nation's leading experts on the MDS 3.0 and Medicare issues. She is the director of The Alliance Training Center, an educational foundation focused on issues related to the care of the frail elderly. She has over 40 years of experience in operational systems for successful long term care facility management.
